Release Information

- Release Version: LiveNX v7.4.1
- Release Date: 05 Oct 2018
- Release Designation: MD (Maintenance Deployment)

Build Information

APPLICATION VERSION

| | |
|-------------------------|----------------------------|
| Server Version : | 7.4.1-20181003-f0a2a2f |
| Web Version : | 7.4.1-20181003-fb82ebb+b84 |
| OVA Version : | 1.23.0 |

OVA Enhancement

- Small OVA default specifications updated to 16 Core vCPU, 32 GB RAM
- Medium OVA default specifications updated to 64 GB RAM

Resolved Customer Issues

- LD-20220: Disconnect Java client session if client's event queue grows too large to prevent slow clients from causing OutOfMemoryError
- LD-20484: SNMP Polling continued to run even when the device is changed to snmp probe
- LD-20627: For SNMPv3 device Polling is Uses More CPU Than needed(to improve CPU Utilization for devices uses SNMPv3)
- LD-20661: in CountryLookup, perform lookup by int for improved performance (to improve performance of reporting and flow collection)
- LD-20662: improve multi-threaded performance of ip address to country lookup (to improve performance of reporting and flow collection)
- LD-20704: WebUI- LDAP: Cannot configure LDAP server when Selecting SSL certificate checkbox
- LD-20342: Export csv fails for report having more than 400 pages

Full List of Resolved Issues

- See 7.4.1 page for a full list of issues that are resolved in 7.4.1
