

LiveNX 21.5.3 Release Notes

Release Information

- Release Version: LiveNX v21.5.3
- Release Date - Jan 26, 2022
- Release Designation - MD (Maintenance Deployment)

Build Information

Application Version

Server Version:	21.5.3-20220126-1430515
Web Version:	21.5.3-20220125-bef48f5356+b10

Resolved Customer Issues

- LS-3039: Reports using the custom application flex search filter will properly execute and cancel on remote nodes
- LS-3032: Servers with duplicate report templates will properly deduplicate them on server start up
- LS-3038: Adding interfaces via the /devices API will no longer require the "interfaceState" property
- LS-3013: ServiceNow integration no longer requires users to select the field to append alert descriptions upon upgrade when upgrading from pre-21.5.x versions.

Bug Fixes

General

- Log4j updated to 2.17.1

API Update

URI	Method	Summary
/devices	PUT	Properties which are not required by the request will now be ignored rather than rejecting the request with a 400 error code
	POST
