LiveNX 21.5.5

LiveNX 21.5.5 Release Notes

Release Information

- Release Version: LiveNX v21.5.5
- Release Date - Sep 28, 2022
- Release Designation - MD (Maintenance Deployment)

Build Information

Application Version

Server Version:	21.5.5-20220921-60aeae8
Web Version:	21.5.5-20220920-929921b561+b2

Known Issues

- ServiceNow version Tokyo will error on initial integration. Reenter the credentials again to resolve the issue
  - All other versions of ServiceNow work without incident

Resolved Customer Issues

- LS-3002: Improved server startup time
- LS-3059: Site geo-coordinate lookup works properly with a proxy configured
- LS-3093: Fixed an issue where interface reachability alerts were not being resolved when an interface was set to admin down
- LS-3150, LS-3160: Fixed an issue which sometimes caused the reports to never complete when making certain queries
- LS-3186: Fixed an issue that occasionally caused intra-node connections to hang indefinitely
- LS-3184, LS-3193: Fixed an issue where Cisco SD-WAN BFD data was not showing up on dashboards due to rate-limiting of API requests
- LS-3225: Fixed an issue which caused users to be forcefully logged out

Bug Fixes

General

- Fixed an issue saving report column selections for report templates
- Improved performance of alert page for systems with many alerts
